Summary of Course Projects:

- During my course in MERN stack web development, I completed various projects to enhance my skills. I started with creating 10 static websites using HTML, CSS, and JavaScript, showcasing my proficiency in front-end development. Additionally, I developed a movies search app, a todo list, and a weather app using React.js. For backend development, I utilized React, Node.js, Express, and MongoDB to build a blog website, a chat app, and an e-commerce website with iShop. I implemented Firebase authentication for secure user access. Furthermore, I incorporated JSON Web Tokens for enhanced security and also resolved bugs in the codebase. Overall, I gained hands-on experience in both front-end and back-end technologies, enhancing my proficiency in MERN stack development.
